

# User Manual

## Introduction

A user guide is commonly known as a user manual. User manual is usually prepared by a technical person like developer or others who technically involved in software project. User manual helps a non-technical person to run a system and make easy to use it at first time.

### Home page of Smart Health

When a user enter into this system, a home page will appear where user can do registration or login to get more activity. Here is the home page of Smart Health web application.

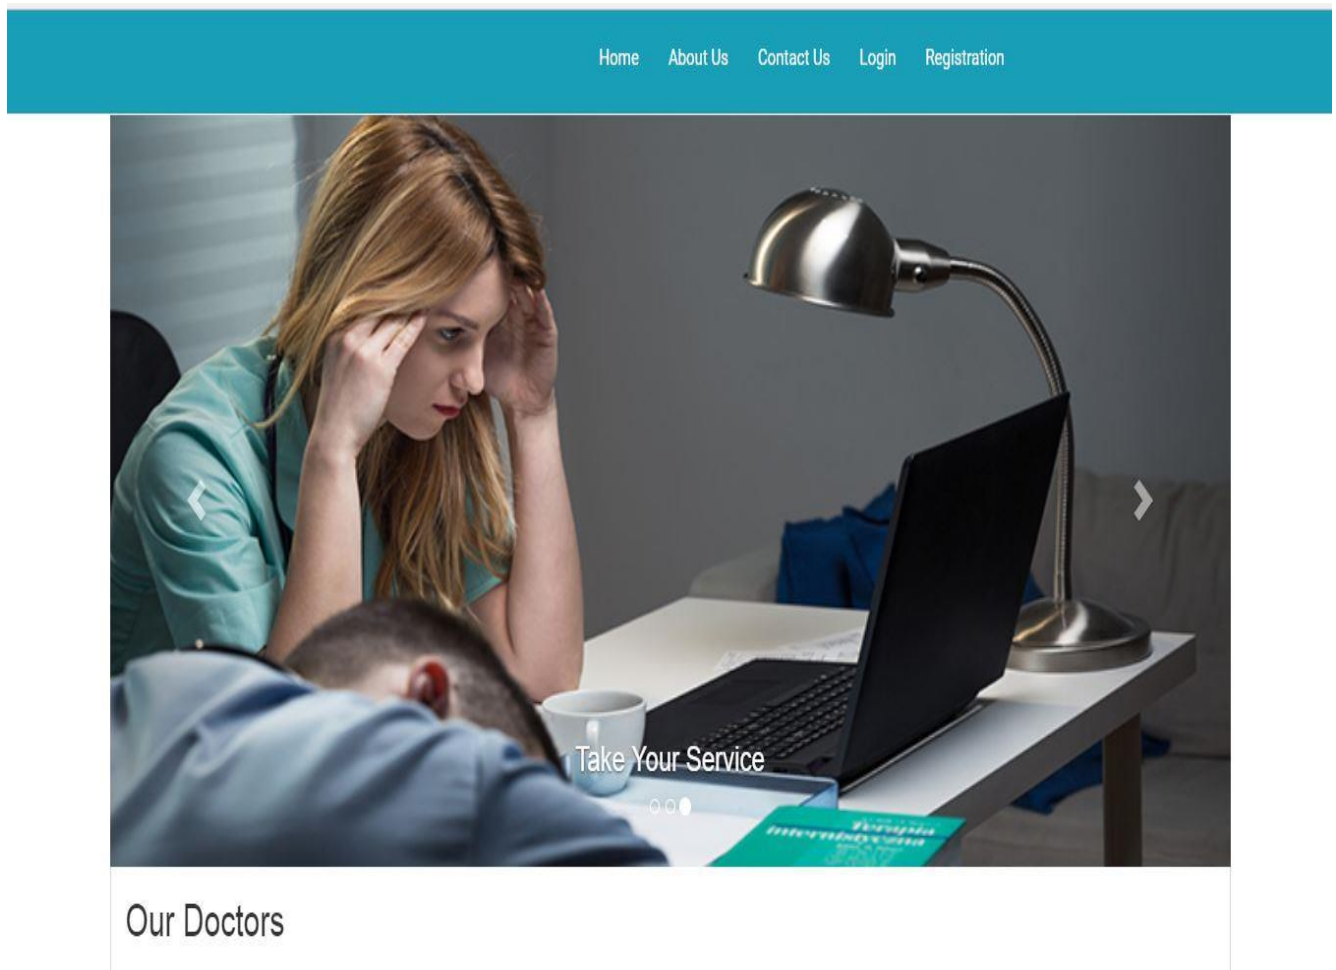

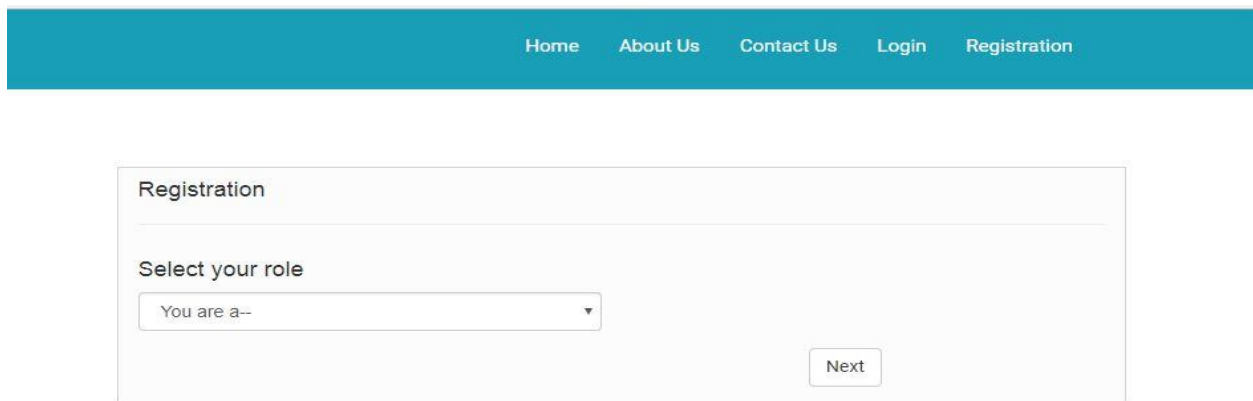

Figure 1: Home page

From home page, user can do registration or login just click on registration or login name.

## Registration page

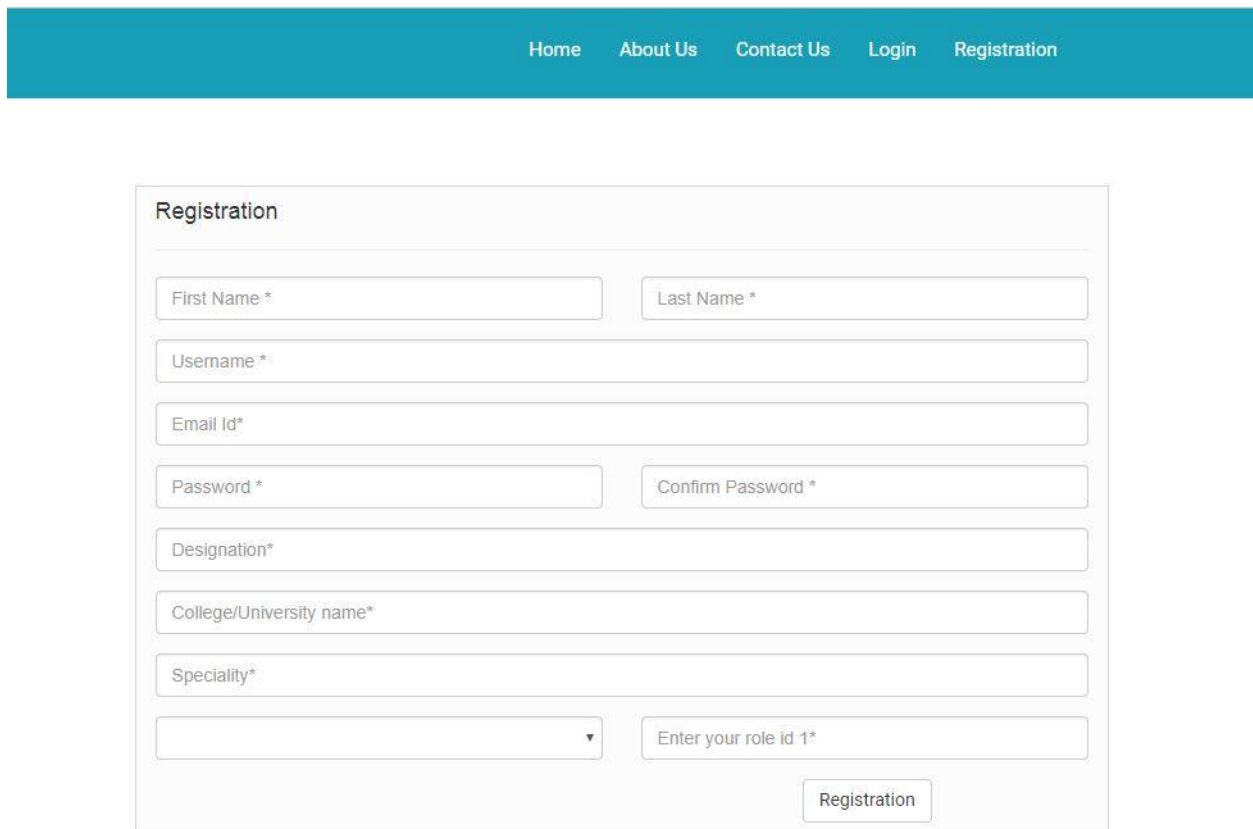

After click on registration, at first user can select his/her role as doctor or patient

The image shows a web page with a teal header containing navigation links: Home, About Us, Contact Us, Login, and Registration. The main content area is a light gray box titled "Registration". Inside, there is a section labeled "Select your role" with a dropdown menu that currently shows "You are a--". To the right of the dropdown is a "Next" button.
